THE DUKE

The Duke is an urban desert, multi-family residential environment consisting of eight attached town homes; three stories high, each with a one-car garage. The modern, pure building cuts a clean sharp edge through the randomly built environment of the surrounding area. Compact and efficient, emphasis was placed on sustainable design through successfully participating in Scottsdale's Residential Green Building Program. The Duke's intent is to express individuality as a singular building with eight individual homeowners, while promoting community through architectural transparency on the second floor.
